

IntelliCorder

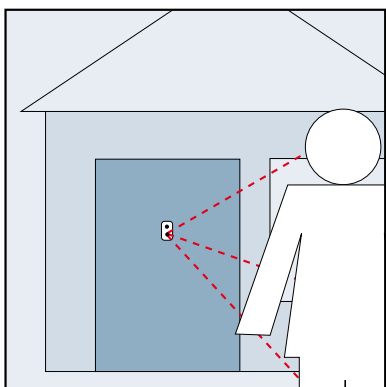

Door- Camcorder

with color monitor and
motion sensor

The IntelliCorder is an electronic door security system consisting of a camera with motion sensor and a monitor.

When the motion sensor detects a visitor, the camera begins capturing images and sound. This is stored in internal memory or on an SD card so that it can be viewed immediately on the monitor or later on a computer. The IntelliCorder increases the sense of security.

In addition to its functionality as a conventional peephole, it also enables door surveillance when no one is at home.

- > **Allows you to open your door safely**
- > **On-screen image reveals your visitor**
- > **Motion activated (PIR) audio/video capture device**
- > **Records high resolution video with sound of guests/ intruders at your front or back door**
- > **Internal memory for recording**
- > **Uses inexpensive SD/MMC memory cards**

IntelliCorder

TECHNICAL DATA

Video camera	1/5" Type CMOS; with Motion Sensor (radius: 2 m; 120° horizontal, 90° vertical) and microphone	
Camera resolution	300.000 pixels	
Digital zoom	2x	
Angle of view	170° diagonal/125° horizontal/90° vertical	
Monitor	1,5" Colour-LTPS (557 x 324)	
File format	AVI; MPEG 4 with Audio	
OSD Language	English, French, Spanish, Italian, German, Portuguese, Japanese, Chinese 1, Chinese 2	
Memory	Internal memory or SD/MMC Card (max. 1 GB) (optional)	
Recording time	128 MB	1 GB
	Fine ~ 15 min	~ 120 min
	SP* ~ 30 min	~ 240 min
	LP** ~ 40 min	~ 320 min
	* Standard Play / ** Long Play	
Power	Charger 100–240 V AC, 50/60 Hz, Rechargeable Li-Polymer Battery-Akku DC 3,7 V	

Colors

white, black, brown

Weight
(incl. battery) 231 g

Door thickness: 35–55 mm
Drilling: Ø at least 14 mm
